

FUNKTION-ONE

F121

The F121 single 21" bass enclosure is a highly attractive proposition for applications desiring access to Funktion One's incredible 21" bass technology but in a smaller form than its double 21" counterpart. The enclosure and Funktion One driver have been beautifully tuned and matched to deliver a highly accurate (and even addictive) bass experience which not only gives the listener the anticipated depth and physicality of bass but combines this with unprecedented upper bass speed and precision. The F121 can be used singly or in multiples with Resolution systems or Dance Stacks. The product is available with either 4 or 8 Ohm drivers.

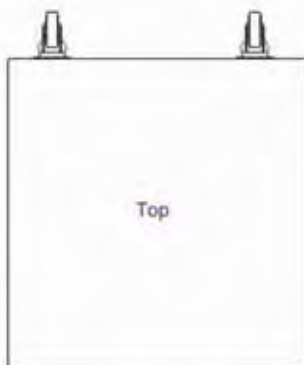

Features:

- Sophisticated loading design with new Andrews' tuning
- Powerful yet relatively compact for its amazing output
- Funktion One designed & tooled double 6" voicecoil driver
- Specialised Neodymium lightweight magnet
- Integral handles
- Optional throat grill and wheels
- Choice of 4 or 8 Ohm drivers

Driver	Usual Operating Band	Sensitivity [1W at 1m]	Power [rms]	Nominal Impedance
