

FUNKTION-ONE

INFRABASS 218

The Andrews' patented Infrabass 218 is a bass design aimed at the octave of 30 - 60Hz. It delivers copious quantities of wonderfully smooth, deep bass for a powerful sonic experience. Often used as the low-end foundation for the Dance Stack, the Infrabass can also give tremendous authority to Resolution 2s adding yet a further dimension to their application. With attention to timing, the Infrabass can be combined with F218s to give the extension and depth of a much larger system. Due to the very large current requirements of extreme low frequencies, only amplifiers with high calibre power supplies will realise the full potential of this product. The optional Double InfraHorn, shown overleaf, can provide significant additional loading (extra 10dB at 33Hz) for a pair of Infrabass 218s in applications with extreme bass requirements.

Features:

- Specialised loading
- Bass extension right down to 20Hz
- Funktion One designed drivers with 5" voice-coils
- Dimensionally identical to F-218
- Includes a curved stainless steel grill
- Integral handles
- Optional wheels

Driver	Operating Band	Sensitivity [1W at 1m]	Power [rms]	Nominal Impedance
2x18"	20 - 80Hz	103dB	1200W	2 x 8Ω 4Ω Total

Please check website for latest system crossover settings

Frequency Response ± 3dB:	25Hz - 80Hz
Weight [ceramic magnets]:	90 kg [198 lbs]
Construction:	18mm Birch ply
Connectors:	2 x Speakon 4 Pole [NL4]
